

The Verdet constant of water for several wavelengths is shown below. Most are from Marvin Weber's *Handbook of Optical Materials*. You can find this on Google Books. The "green" one is from the Handbook of Chemistry and Physics.

λ nm	V_B (Rad/Tm)
347	12.4
458	6.78
488	5.85
514	5.24
580	4.1
596	3.81
633	3.35
694	2.66
